Lab Exercises 1

Saqib Chaudhry - MTU

1 Question 1

Use a text editor to modify an existing web page so that it adheres to web standards and also to include a title, heading and some text

2 Question 2

Add a list and a nested list to the page

3 Question 3

Validate the web page and fix any errors

4 Question 4

Find an image that is licenced for use and include it in the web page in such a way that it appears in its own block

5 Question 5

Explore other HTML elements that we have covered in lectures by extending the web page (header, main, footer, nav, aside, section, article, a(nchor), video, em, strong, i, b, small)
